## Logical Innovations Goes International

London's Parliament Square at dusk.

**L**ogical Innovations, Inc., through our partnership with Training and Development Systems, has a new commercial project providing competence assurance and communications support, providing us with an international presence, as our efforts now extend 'across the pond' with our team recently supporting client events in London. This exciting new project furthers our efforts in the commercial energy industry, expanding our corporate footprint.

## Solutions for Enterprise Wide Procurement (SEWP) Symposium 2012

SEWP expo booth, providing program information, assistance, and training.

**L**ogical Innovations supported the SEWP Symposium 2012 this April in Philadelphia, PA. The NASA SEWP GWAC (Government-Wide Acquisition Contract) provides the latest in Information Technology (IT) products for all Federal Agencies.

Logical Innovations is proud to be a member of the SEWP Program Office team, and has supported

SEWP since our beginning in 2006.

The annual symposium offers multiple training opportunities for federal agencies and contract holders, alike. Federal agencies also have individual sessions with SEWP program management to share and provide insight into their needs, and suggestions for ways to improve SEWP offerings.

# CHILI COOK OFF 2012

**T**hank you to everyone who joined us at this year's JSC FOD Chili Cook-off.

Heavy winds and torrential rain the night before the event couldn't hold us back; we had our largest ever team turn out.

Logical Innovations team member Doug York cooked this year's chili and received much praise from both visitors.

"I made one test batch of chili at home, but cooking a big batch was a bit different," said Doug. "Overall I was happy with the results." The judges were happy with his results as well; his recipe made it to the second round of judging, a first for our team.

We had strong scores in the Human Pyramid (10 seconds) and the Spoon Drop (45 seconds) but did not place in the top three in either game. A dropped grapefruit kept us from reclaiming our title in the Grapefruit Pass for the second year in a row.

For a complete list of results, visit the JSC FOD Chili Cook-off website at <http://external.jsc.nasa.gov/events/Chili/index.cfm>.

# A Message From the President

**T**his May we reflect on a number of events occurring throughout the company, and I personally have many mixed emotions to share. May marks anniversaries of our JSC Procurement Support and Administrative Support Services Contracts.

Under these contracts,

we have fantastic employees that make us proud daily. Unfortunately, we've also experienced the impact of recent budget cuts and have lost some great members of our team. We wish them all the best, and hope that we will cross paths again soon.

Times like these make us even more determined to continue our efforts toward growth, and create new opportunities within the communities we live. Along those lines, we have been fortunate in gaining new projects in our commercial efforts, one that takes us internationally.

We appreciate our current customers and work hard to make sure we are able to continue to support them in an outstanding and dedicated manner.

Congratulations to Kristin Fuller, Monica Orosco, Rebeca Perez and Kenia Vasquez on their new assignments—we are proud of you and appreciate your outstanding support of our customers!

Finally, I want to thank all members of our team, as we work together in the best interest of our customers and maintain our Logical Innovations family.
