## Logical Innovations, Inc. wins NASA Glenn Research Center Visitor Education and Community Outreach Support Services (VECOSS) contract, expands to Cleveland, Ohio

**L**ogical Innovations, Inc. is pleased to announce our award of the Visitor Education and Community Outreach Support Services (VECOSS) contract at the NASA Glenn Research Center (GRC) in Cleveland Ohio.

The scope of the project includes managing and operating the GRC Outreach Program and Special events. LI2 will maintain the inventory of the GRC exhibits, artifacts, and related equipment which include several unique items ranging from flight simulators, museum quality exhibits, spacecraft mock-ups, lunar samples and the spacesuit worn by Ben Affleck in the film “Armageddon.”

In addition to maintaining existing exhibits, LI2 will be responsible for the design, construction, and installation of new indoor, outdoor, and traveling exhibits throughout the duration of the contract.

VECOSS Community Outreach activities supported by LI2 will include operating the tour and volunteer program, coordination of Briefing Center activities, overseeing public mail and publications, managing the GRC Speakers Bureau, and supporting selected community parades. This contract also highlights the partnership with the Great Lakes Science Center in downtown Cleveland, which now houses the NASA/GRC Visitor Center.

VECOSS is Logical Innovation’s first contract with the NASA Glenn Research Center, and second venture in exhibit and outreach projects following the recent U.S. Army 1st Cavalry Division (1CD) Headquarters Museum Exhibit contract in Fort Hood.

Primary contract performance will begin on November 1, 2012 at NASA/GRC in Cleveland, Ohio, and Plumbrook Station in Sandusky, Ohio.

# A Message From the President

October has been another great month for Logical Innovations. We have been awarded the NASA/Glenn Research Center (GRC) Visitor Education and Community Outreach Support Services (VECOSS) contract. We are excited about supporting another NASA Center, welcoming a new group to our Logical Innovations team, and

opening our new office in Cleveland, Ohio. We have been busily transitioning this effort, and look forward to our first day of contract operations on November 1.

On October 25, we attended the award ceremony to receive our award for the honor of being named one of “Houston’s Best and Brightest Companies to Work For™.” This event featured training sessions and exhibits, where we had the opportunity to meet our fellow honorees and learn new ways to improve our offerings for our employees.

It has truly been another exciting month, and I appreciate the efforts of our entire team who perform consistently to help grow our solid reputation.

Again, this newsletter is yours and I ask you to please contribute to keep us all informed and keep our communication lines open. Thanks, as always, for the great job you all do in support of our great customers across the country.
